PROFESSIONAL SUMMARY

B.Sc. IT graduate with a strong foundation in secure application development, networking protocols, and system architecture. Hands-on experience implementing Identity and Access Management (IAM), Role-Based Access Control (RBAC), and real-time network communications. Certified in practical IAM strategies through a corporate job simulation. Seeking a Graduate Engineer Trainee or entry-level Infrastructure/Security role to leverage a strong software engineering background in protecting and managing enterprise environments.

TECHNICAL SKILLS

Security & Networking: Identity & Access Management (IAM), Role-Based Access Control (RBAC), JWT Authentication, Bcrypt, WebSockets, HTTP/REST, API Security

Backend & Database: Node.js, Express.js, MongoDB, Mongoose, MySQL

Frontend & Mobile: HTML5, JavaScript (ES6+), React.js, Flutter

Tools & Deployment: Git, GitHub, Postman, Linux basics, Vercel, Render

Learning: TypeScript, Docker

CERTIFICATIONS

Cybersecurity Analyst Job Simulation | TCS Forage | June 2026

- Completed practical tasks focusing on Identity and Access Management (IAM) fundamentals.
- Conducted IAM strategy assessments and crafted custom IAM solutions.
- Gained hands-on understanding of secure platform integration.

Technology Job Simulation | Deloitte Forage | June 2026

- Completed practical tasks in Coding and Development.

PROJECTS

Treasure to Charity — Donation Platform

2025 – 2026

Full-Stack Engineer | MERN Stack, Razorpay, JWT, Bcrypt

- Engineered a secure donation platform featuring strict Role-Based Access Control (RBAC) to isolate data access between Donor, Admin, Buyer, and Orphanage profiles.
- Implemented secure user authentication and session management using JWT and Bcrypt for password hashing.
- Designed a transparent 30-30-40 resource allocation algorithm ensuring auditable distribution of donated goods.
- Integrated Razorpay payment gateway and improved OTP email delivery by migrating from SMTP to the Brevo HTTP API for reliable production deployment.

IronPulse — Gym Management System

2026

Full-Stack Engineer | MERN Stack, Socket.io, JWT

- Developed a highly secure attendance system utilizing a time-sensitive, rotating QR-code token algorithm to completely eliminate credential sharing.
- Integrated Socket.io over Node.js to manage real-time, concurrent connections and live dashboard monitoring.
- Secured backend REST APIs with token-based authentication to protect member financial and attendance records.

BiblePresenter — Network Casting Application

2026

Mobile Developer | Flutter, Dart, Shelf, WebSocket, PDF.js

- Built a cross-platform application capable of local network casting by establishing an embedded Shelf HTTP and WebSocket server.
- Engineered low-latency synchronization and real-time data packet transmission over local Wi-Fi networks.
- Implemented client-side Bible book data to reduce verse retrieval latency and remove server dependency for core scripture lookup.

EDUCATION

B.Sc. in Information Technology

2026

Viva College, University of Mumbai

HSC (Science)

2023

Vidya Varidhi Vidyalaya & Jr. College

SSC

2021

Sant Leela Shah High School

ADDITIONAL STRENGTHS

Strong logical problem-solving skills, fast learner with ability to pick up new technologies independently. Interests include acoustic guitar, chess puzzle solving, and competitive gaming strategy.
